ARJUN BALPANDE

CSE STUDENT

PROFESSIONAL SUMMARY

I am a motivated and detail-oriented Computer Engineering student with a strong foundation in programming, software development, and problem-solving. Proficient in languages such as HTML, CSS, JavaScript, C, and Python, with hands-on experience in full-stack web development, machine learning, agentic AI workflows, and database management. I aim to apply my technical knowledge, learn new technologies, and contribute to innovative software solutions.

EDUCATION

Bachelor of Technology, Computer Science, Expected in 06/2028
SYMBIOSIS INSTITUTE OF TECHNOLOGY - Nagpur, India

Senior Secondary School, STUDENT, 04/2024
ST. PAUL SCHOOL - Nagpur

No Degree, STUDENT, 04/2022
BHAVAN'S BP VIDYA MANDIR - Nagpur, India

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern, 05/2026 – 06/2026
SYTEOS LABS LLP - Pune, India (Remote)

- Designed and developed responsive, accessible web interfaces adhering to modern UI/UX design standards.
- Implemented backend service endpoints, data persistence schemas, and database connectivity for seamless data flow.
- Gained practical exposure to industry-standard software engineering workflows and collaboration under CTO mentorship.

Python Developer Intern, 03/2026 – 04/2026
KODBUD - Remote

- Developed and tested 4 modular Python CLI applications: Contact Book, Password Checker, Calculator, and Number Guessing Game.
- Implemented structured function design, robust input validation, exception handling, and clean code principles.

SKILLS

Programming Languages: Python, C, C++, Basics of Java

Web Technologies: HTML5, CSS3, JavaScript (ES6+), REST APIs

AI & Machine Learning: TensorFlow, Keras, OpenCV, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, LSTM Networks

Agentic AI & Automation: OpenAI Agents SDK, Groq API (LLaMA 3.3, GPT-OSS-120B), Tavily AI Search, LangChain Core, Telegram Bot API

Databases & Tools: MySQL, SQL, Git, GitHub, Linux/Bash, Gradio, Jupyter Notebooks

LANGUAGES

English - Intermediate (B1)

Hindi - Intermediate (B1)

Marathi - Intermediate (B1)

German - Beginner (A1)

CERTIFICATIONS

Infosys Springboard Data Structures and Algorithms using Python

Red Hat Training Presents – Introduction to Python Programming (AD141)

Red Hat Training – Red Hat System Administration I (RH124)

Red Hat Training – Network Automation with Red Hat Ansible (DO457)

Udemy – Mastering Agentic AI: From Prompt to Protocols to Production

PROJECTS

Agentic AI

Python, OpenAI Agents SDK, Groq API (LLaMA 3.3), Tavily AI Search, LangChain Core, Asyncio

- Architected an autonomous multi-agent research workflow coordinating sequential Planner, Search, Analyst, and Writer agents to generate synthesized reports.
- Implemented a real-time fact-checking agent using OpenAI Agents SDK with Groq API integration and Tavily web-search tool execution.
- GitHub: https://github.com/arjunabalpande06/Agentic_AI

Student Deadline Reminder Automation

Python, Gradio, Groq API (GPT-OSS-120B), Telegram Bot API, Asyncio, JSON Persistence

- Built a Gradio web application featuring an LLM-powered natural language task assistant that extracts assignment names, deadlines, and categories.
- Engineered an automated background deadline monitoring service dispatching scheduled notifications and same-day alerts via Telegram.
- GitHub: https://github.com/arjunabalpande06/Student_Deadline_Reminder_Automation

Smart Grid Energy Forecasting Using ML

Python, TensorFlow, Keras, LSTM Networks, XGBoost Regressor, Scikit-learn, Gradio Web UI

- Engineered comparative regression and deep learning pipelines forecasting micro-scale household power consumption (~2M rows) and national grid demand.
- Trained sequence-based LSTM recurrent neural networks and gradient boosting models; integrated a local Gradio UI for real-time inference on test data sequences.
- GitHub: https://github.com/arjunabalpande06/Smart_Grid_Energy_Forecasting_Using_ML

Image Detection using R-CNN

Python, TensorFlow, OpenCV

- Conducted research on object detection using R-CNN architecture for image localization and classification.
- Designed and trained a deep learning model achieving accurate multi-object detection.

Customer Segmentation using Python (Patent Published)

Python, Scikit-learn, Pandas

- Performed research-based customer segmentation using K-Means clustering on behavioral datasets.
- Identified key customer groups for targeted marketing; work resulted in a published patent (Application No. 202521127272).

PYTHON:

- Basic Bank Management System - Features account creation, balance inquiry, deposit/withdrawal validation, and file-based data persistence.

C:

- TIC-TAC-TOE game - Console game in C featuring procedural game loop, dynamic 3x3 matrix board rendering, and win/draw evaluations.
